

JOIN OUR TEAM

NEUROCOM

Neurocom S.A. is an experienced IT software and services provider delivering mission-critical software solutions in the telecoms sector.

We have been helping business customers increase their business productivity and profitability since 1999. We serve both national and international customers in the areas of billing and pricing, commissioning and incentive management, point of sales and order management, data warehouse and business intelligence.

Front-End SW Engineer - Job Brief

At Neurocom S.A. we are looking for a Front-End SW Engineer to join the team of developers behind our TariffSuite solution: the pricing and analysis simulation tool.

The team also acts as the service delivery group for Neurocom S.A., dealing with a variety of compelling and high-priority projects mainly in the telecoms sector.

Main Responsibilities

- Enhances and enriches the web interface of the pricing and analysis simulation tool
- Creates intuitive, efficient, frustration-free user interfaces for projects of varying complexity in the area of telecom business support systems (BSS)
- Develops web interfaces in Angular in cooperation with our team of Java/Full Stack developers
- Supports existing applications written in AngularJS and gradually ports functionality to Angular
- Ensures timely delivery in compliance with specifications and project plans

Job Requirements

- Degree in Computer Science, Computer Engineering or Informatics
- Solid knowledge of Javascript and Angular
- Experience with AngularJS 1.X is a plus
- Familiar with Relational databases (preferably Oracle, Postgres)
- Experience in Java is an asset
- Excellent command of the English language both written and spoken
- Military obligations fulfilled, if applicable

Personal Skills

- Execution driven; transforms ideas into practice
- Problem solver; analytical and synthetic mind-set
- Positive, open-minded, can-do attitude
- Results oriented

We offer:

- Competitive salary
- Agile company culture embracing simplicity, speed, flexibility, autonomy and diversity
- Exposure to modern technologies & techniques
- Continuous training opportunities aiming at professional mastery and personal growth
