

JOIN OUR TEAM

NEUROCOM

Neurocom S.A. is an experienced IT software and services provider delivering mission-critical software solutions in the telecoms sector.

We have been helping business customers increase their business productivity and profitability since 1999. We serve both national and international customers in the areas of billing and pricing, commissioning and incentive management, point of sales and order management, data warehouse and business intelligence.

Oracle Software Engineer - Job Brief

Neurocom S.A. presently requires talented Oracle Software Engineers (Junior & Senior profiles) to become members of the team behind our CommissionSuite solution: the application for managing sales performance and commission plans in five network operators, including one of the key players in the telecom business.

As an Oracle SW Engineer you will be responsible for developing, testing, improving and maintaining new and existing databases to help users retrieve data effectively. You will participate in all team activities and assume responsibilities of increasing complexity as your experience grows. You will interact directly with customers in both Greek and English.

Main Responsibilities

- Participates in application database development using SQL and PL/SQL while delivering value in the full software development lifecycle from concept and design to testing
- Writes well designed, flawless, testable and efficient code
- Ensures timely deliveries in compliance with specifications and project plans
- Prepares and produces releases of software components
- Analyses user needs & SW requirements to determine feasibility of design within time and budget
- Troubleshoots and resolves issues in existing installations
- Writes and maintains technical documentation pertinent to the full SW development lifecycle

Job Requirements

- Degree in Computer Science, Engineering, Mathematics or any other closely related field
- Hands-on experience in Software Development
- 2+years' experience as a database developer using SQL and PL/SQL
- In-depth knowledge of Oracle (depending on seniority level)
- Understanding of data management (e.g. permissions, recovery, security and monitoring)
- Knowledge of .NET framework will be considered a plus
- Excellent command of the English language both written and spoken
- Desirable: Finance/CRM applications, prior working experience in telecommunications
- Military obligations fulfilled, if applicable

Personal Skills

- Systematic, disciplined and analytical mind-set
- Highly focused and detail-oriented
- Positive, self-motivated, can-do attitude
- Financially acumen
- Team player with excellent communication skills
- Customer oriented: understands users requirements and exhibits problem solving attitude

We offer:

- Competitive salary
- Agile company culture embracing simplicity, speed, flexibility, autonomy and diversity
- Multi-project team environment with experienced high-caliber professionals delivering mission-critical applications that impact hundreds of users
- Exposure to modern technologies & techniques
- Continuous training opportunities aiming at professional mastery and personal growth
